

Model range Audi models by CO₂ emissions

The fuel consumption and CO₂ figures quoted in this Guide are obtained under standardised EU test conditions (Directive 93/116/EEC). This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. More information is available on the Audi website at www.audi.co.uk and at www.dft.gov.uk/vca/fcb/index.asp

All data correct at date of publication, December 2014. All prices shown are P11D prices applicable to vehicles in standard trim. All prices shown are correct at date of publication (December 2014) and include VAT at 20%. All models listed are equipped with standard-fit transmission unless otherwise stated. All Audi diesel engines are fitted with a Diesel Particulate Filter (DPF) as standard.

The fuel consumption and CO₂ figures quoted in this document are obtained under standardised EU test conditions (Directive 93/116/EEC). This allows a direct comparison between different manufacturer models but may not represent the actual fuel consumption achieved in 'real world' driving conditions. More information is available on the Audi website at www.audi.co.uk and at www.dft.gov.uk/vca/fcb/index.asp.

*Electronically limited. ¹1.4 TFSI engine with Audi cylinder-on-demand technology. ²Combined output of petrol engine and electric motor. ³Excluding £5,000 Government-applied Ultra Low Carbon Car Consumer incentive for Ultra Low Emission Vehicles (ULEVs), applied subject to Government approval

Please note: CO₂ emissions can change if a different sized alloy wheel is ordered with the vehicle. This may also lead to a change to the VED amount payable.
