AC: Slow/fast Type 2

Max AC 1 phase rate: 7.4kW
Max AC 3-phase rate: 7.4kW

Connector location: Left side - rear

* This guide applies to Q5 50 TFSI and Q5 55 TFI e

**Assumes tariff of 14p/kWh. The cost of home charging will vary depending on your electricity rate.

Charging details[†]

Charging time for an Audi Q5 TFSI e

The table below shows the estimated time to charge your Audi Q5 TFSI e from empty to full. For rapid charging we show the time to charge from 20%-80% as charging tends to slow outside this range to protect the battery.

Charging method	Typically found at	Charging time*	Range/hour**
Empty to full			
3-pin plug	Home	6 h	4 m/h
3.7kW	Home/Work	4 h	6 m/h
7kW	Home/Work/Public locations	2 h	12 m/h
22kW	Work/Public locations	2 h	12 m/h
20%-80%			
50kW	Public locations	N/A	N/A
150kW	Public locations	N/A	N/A

* Based on Pod Point estimates, charging rates can differ based on the ambient temperature, the state of the battery (e.g empty or half full) and variation in charging rate.

** Range per hour is the number of miles you can expect to get from an hour of charging at the relevant rate.

† Based on the Q5 TFSI e models

Choose your home charger model

As Audi's recommended supplier - Pod Point offer two different types of home charging units.

Solo Universal

Compatible with any plug-in vehicle.
You will need a charging cable.

Solo Tethered

The most convenient charging experience.
Charging cable is attached to the unit.

Both models are applicable for OLEV grants, weatherproof and Wi-Fi enabled

Pod Point Install Process

1) Order via pod-point.com or speak to your Audi dealership.

2) OLEV grant application (pending eligibility).

3) We will call you the next day to arrange an install.

4) Pre-install phone survey carried out free of charge.

5) We will install and demonstrate how to use your charger.

Choose your charging power

Recommend ★

3.7kW Charger

1.6x faster than a 3-pin plug

- Provides an EV with up to 10 miles of range per hour (RPH)
- Compatible with a Type 2 connector
- Price includes standard installation

7kW Charger

3x faster than a 3-pin plug

- Provides an EV with up to 18 miles of range per hour (RPH)
- Compatible with a Type 2 connector
- Price includes standard installation

22kW Charger

Requires three phase power

10x faster than a 3-pin plug

- Provides an EV with up to 28 miles of range per hour (RPH)
- Compatible with a Type 2 connector
- Price includes standard installation

Note: The Audi Q5 TFSI e onboard charging is capable of receiving a 7.4kW charge

Pricing & a more detailed look at our installation process, can be found online at:

pod-point.com/products/homecharge

*Standard installation terms available at pod-point.com

OLEV grant

The OLEV grant allows you to reduce the cost of your homecharger by £350.

Office for
Low Emission
Vehicles

Eligibility Checklist:

- You have dedicated off-street parking.
- Your plug-in vehicle was purchased after 1st October 2016.
- You have not already claimed the grant for your vehicle.
- By claiming the grant, you are not exceeding the limit of two OLEV funded chargepoints per household.

If you qualify for the grant, Pod Point will take care of the claim on your behalf.
